

Total trip times and avg trip time.

Bike 21078 was only checked out once, but for 301 Hours!!

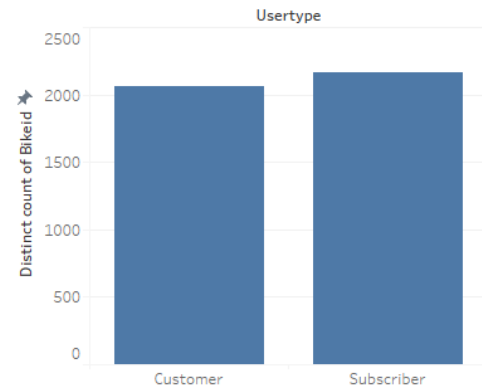

Avg. Trip Duration in min  
3 18,059

These tables reveal that some bikes have been ridden for thousands of hours!

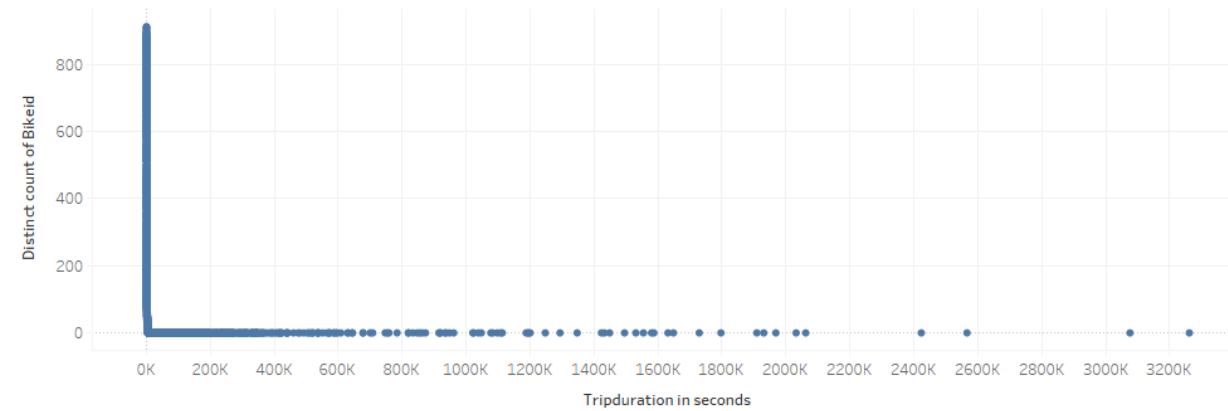

The average trip duration across all bikes is 15.9 minutes. Some bikes have a much longer average trip duration though. This may be due to lock / end trip malfunctions, forgetting to log out or very long day trips.

### User type Vs unique bicycles

Both subscribers and general customers appear to be using all of the bikes at their disposal. There does not appear to be any bicycles used only by subscribers. Total count of unique bike ID = 2180

### Time bike has been checked out vs unique id

While bikes are low on their total time checked out (below 6000 sec or 100 min), it is common for them to share their exact time check out with other bikes. Once you get above 100 minutes of using a bike, it is rare for another bike to share its same time of total rental.
